

# LAUTARO MUIÑO

## FULL STACK DEVELOPER

### PROFILE

Full Stack Developer in training, with solid knowledge in React, Node.js, TailwindCSS, and SQL/NoSQL databases. I am seeking my first professional opportunity to apply my technical skills and continue growing in collaborative environments. I am characterized by motivation, quick adaptability, and a strong commitment to learning new technologies.

### EXPERIENCE

#### Front End and Full Stack Projects

##### Gastroenterology Center

- Development of the main informational webpage for a real client, aimed at showcasing the center's data and services.
- Main contribution in design and visual layout, prioritizing a clear and user-friendly interface.
- Used Next.js, TailwindCSS, and TypeScript to implement a modern, responsive, and scalable solution.

##### E-commerce – Frontend

- Implemented a functional e-commerce using ReactJS for frontend management.
- Built reusable components, optimized navigation with dynamic routing, and handled state using React Hooks.
- Focused on enhancing a smooth and efficient shopping experience, with a responsive design adaptable to different devices.

##### E-commerce Platform – Full Stack

- Complete development of the project (frontend and backend).
- Frontend built with ReactJS, delivering an interactive and dynamic user interface.
- Backend developed with Node.js and Express, creating a RESTful API for product management.
- Database implemented in MongoDB for product storage and administration.
- Solved technical challenges related to API integration, user authentication, and data persistence.

### EDUCATION

##### Programming Technician

National Technological University  
2025 - present.

##### Full stack developer

National Technological University  
2023 - 2024
