## EXPERIENCE

### Front End and Full Stack Projects

**Technologies used: Next.js, TailwindCSS, TypeScript**
Front-page for a client: gastroenterology center, that allows patients to watch information about the center and the services they offer.

**Technologies used: ReactJS (Front-end)**
I built a functional e-commerce platform using ReactJS for front-end management, aimed at providing a smooth and efficient shopping experience. The project involved creating reusable components, managing state with hooks, and implementing dynamic routes for product and category navigation.

**E-commerce platform (Front-end and Back-end)**
For this e-commerce project, I used ReactJS for the front end. On the back end, I implemented Node.js with Express to create an API, and MongoDB as a database for product storage.
